If you are using FS2004, then the version of Panel Builder that you are using works with both FSX and FS2004. However, it does not support the following features: FS2004 Simulated Life support - FS2004 does not support simulated life, such as walking or sleeping. To simulate flying, set Flight mode to FSX or Prepar3D. FS2004 Flight mode - When you set Flight mode to FS2004, only HUD support is enabled. To control a simulated life model, use the "Set Model" option on the options tab of the HUD editor and then set the model in the settings dialog. Beaver33 wrote: Does Panel Builder work on Windows XP? Does Panel Builder work on Windows. A. If you are using FSX or Prepar3D, upgrade to Panel Builder Version 2.7. Chris I would really like to see the support of Sim Life in FS2004. I do not have FS2004, but I do have Panel Builder V2.7. Thanks for the update! I am using FS2004 version 5.0. I want to play MP3 sound while flying and I have installed MP3 Player and all is fine, but I can not hear the sound when flying. Does Panel Builder work with FS2004?
